**Subject:** City Basin Completion Summary example for TCT  
**Date:** 02/08/2013 09:16 AM

---

Hello!

As we discussed in the TCT meeting on Jan 23rd, when I gave a short briefing on the status of the "source control decision" for the City Outfalls project, I have uploaded some information to DEQ's ftp site for the TCT members to view. Please cc me when you forward this on to the TCT so that I can have contact information.

There are 8 files, zipped, so it takes a little while to download. The briefing sheet is included, as well as a draft completion summary for Basin 19, some draft figures (which really tell the story in a snapshot), draft notes explaining the figures, and then 5 detailed data reports/technical memos prepared during the investigation which represent the level of information available on each basin and referenced in the summary documents.

The information can be accessed at:

nonresponsive

will only be available on the ftp site for 90 days, so it should be downloaded soon. Once folks have had time to review it, I'm happy to answer questions or provide additional information on other basins to get folks up to speed on the outfall project, in anticipation of DEQ's draft source control decision memo this summer.

Thanks for any input you have to share.

--Alex
